

# Electronic Window Display

The Makerspace has a window display unit which can display images in Portrait format. If you teach a class or have some other PSA image you would like it to display, please add it to this page.

Due to size restrictions, you may need to upload the full-res file to the Slack, or elsewhere on the internet and post a link here.

Current Needs: investigate and correct the Overscan issue. Marisa assisting.

- Problem description: the displayed image is too large for the TV screen, and the outer borders get cut off.
- RCA settings menu: press settings on remote, then quickly press 1147 to display full settings
- Need to research raspberry pi documentation and adjust `/boot/config.txt` (or equivalent) to troubleshoot overscan.

Things we've discovered:

- Besides the selected playlist, the player group will also display items on the playlist named "default".

Current Assets:

Albert Einstein Quote

"The important thing  
is to never  
stop questioning"

- *Albert Einstein*

We love questions!  
Inquiring minds  
are welcome here.

Carl Sagan Quote

**"We live in a society  
exquisitely dependent on  
science and technology,  
in which hardly anyone  
knows anything about  
science and technology"**

**- Carl Sagan**

**Let's change that!**
